Chalk's Early Jewel

See page 5 for description

GROWING flowers has always been my hobby from the days when only a child six years old, I had the sitting room window filled with growing plants, until now, when I can only be satisfied by growing the best varieties in the respective classes.

Yours very truly,

IRA R. AMOLE.

In presenting my latest catalogue I offer only the best old kinds, as well as the many desirable new varieties of Plants and Seeds. The aim of Rose Side Gardens is to grow and sell only the very best. We do not claim to undersell all competition but endeavor to excel in grade and quality. That we are succeeding in doing this is shown by the large number of orders received from old customers and the many new customers coming to us, because of the good things said about our stock by others. New Aster—HEART OF FRANCE

The best pure red aster ever introduced. Heart of France opens red as the purest ruby, deepens with age and retains its remarkable beauty to the very end. "MY FAVORITE"—GLADIOLI

The Gladioli is undisputably the King of Flowers. And if nature bids us believe flowers came to us direct on Angels' wings, surely the Gladioli must be a tiny wisp transplanted from the heart of Heaven, for its coloring like the rainbow, and the daintiest of butterflies, is so chaste and wonderful. The progress made in the type and color of the Gladioli has been the most remarkable in the history of any flower. And the favorites of yesterday are nothing in comparison to the wonderful size and coloring of the Gladioli of today—the collection I offer has no peer in America. They are all grown in our own gardens, the soil of which is especially adapted to Gladioli. The bulbs are large and plump and absolutely true to name.
